ALNA K

React Developer Intern

+91 9846581647 | alnababu1938@gmail.com | Calicut

Motivated and detail-oriented **Computer Hardware Engineering Diploma graduate** with a strong interest in web development and modern frontend technologies. Currently gaining practical industry experience as a **Frontend Developer Intern at Acadeno Technologies**, working with **React.js** to build responsive and user-friendly web applications. Eager to develop technical skills, learn new technologies, and contribute effectively to a professional development team.

CORE COMPETENCIES

- **React.js Development**
  Building interactive and reusable user interfaces using React.js.
- **JavaScript (ES6+)**
  Creating dynamic and functional web applications using modern JavaScript.
- **HTML5 & CSS3**
  Developing structured, clean, and visually appealing web pages.
- **Responsive Web Design**
  Creating websites that provide a smooth experience across mobile, tablet, and desktop devices.
- **Component-Based Development**
  Developing reusable and maintainable components for efficient React applications.
- **Git & GitHub**
  Using version control for code management and collaborative development.
- **UI/UX Implementation**
  Converting designs into clean, user-friendly, and responsive web interfaces.
- **Debugging & Problem Solving**
  Identifying and resolving frontend issues to improve application functionality.
- **Team Collaboration**
  Working effectively with team members in a professional software development environment.

PROJECTS

Savora – Restaurant Website | React.js Project

- **Developed a modern and responsive restaurant website using React.js.**
- **Designed an attractive homepage to showcase the restaurant.**
- **Created an About Us page to display restaurant information.**
- **Implemented a food menu to showcase different dishes.**

- **Added a gallery to display food and restaurant images.**
- **Created a customer testimonials section to display reviews.**
- **Implemented navigation between pages using React Router DOM.**
- **Used CSS3 to create an attractive and responsive user interface.**
- **Used reusable React components to organize the project.**
